PARTNERSHIP

CROSS RIVER PARTNERSHIP

[home](#) [about us](#) [news](#) [contact us](#) [projects](#) [glossary](#)

Cross River Partnership's creative regeneration solutions create physical and social links between the two sides of the river in central London, breaking down barriers and creating conditions for economic growth.

Cross River Partnership's work focuses on three main areas:

transport

Through its transport programme, Cross River Partnership aims to bring London's communities closer, improve access to jobs, healthcare and education and enhance public realm. CRP's strategic transport invention is Cross River Tram.

regeneration

Bridging the gap between deprivation and prosperity in central London, CRP's regeneration programme not only focuses on physical improvements, but also enhancement of accessibility to jobs and support for local enterprise.

employment

Cross River Partnership works with a large number of small to medium sized enterprises to encourage innovation and entrepreneurship, providing general business support.
